Being located in front of the coast made possible the existence of numerous spas, yacht clubs and social clubs of the wealthiest sectors. Miramar's urban project was conceived and signed in 1910-11 by Cuban engineer Luis Morales y Pedrosa (graduated from Columbia University New York) and brother of the architect Leonardo Morales Pedrosa making it a 100% Cuban urban project. by those who love the goodness of its nature, Marianao is distinct from other Havana's municipalities by the abundant presence of vegetation in all its area.
